LIST OF CONTENTS

NUMBER 1

A. M. R. Al-Marafie	1	Assessment of oil and natural gas resources in Kuwait
Edward Kahn	9	Proxy plant valuation methods for demand-side utility programs
A. Venkatesh and **V. Sriramulu**	23	Analysis of a flat-plate collector serving as a generator in an intermittent solar refrigeration system
Roy Boyd and **Noel D. Uri**	29	Assessing the impact of an oil import fee
Note		
E. Taşdemiroğlu	45	Natural gas in Turkey
Software Survey Section	I	

NUMBER 2

Hugh B. Stewart	49	An energy agenda for the future
B. K. Bala, M. M. Karim, and **D. P. Dutta**	61	Energy-use pattern of an electrified village in Bangladesh
D. Poulikakos and **J. M. Johnson**	67	Second law analysis of combined heat and mass transfer phenomena in external flow
Mahmoud A. Kaboudan	75	An econometric model for Zimbabwe's future electricity consumption
H. P. Garg, G. Datta, and **Ashok Kumar Bhargava**	87	Performance studies on a finned-air heater
M. W. Rufo and **M. R. Brambley**	93	Measuring the components of regional energy conservation: residential natural-gas consumption in St. Louis
Corrigendum	111	
Software Survey Section	I	

NUMBER 3

D. Khummongkol and **C. Tangsathitkulchai**	113	A model for tar-removal efficiency from biomass-produced gas impinging on a water surface
Lin Wenxian	123	Optimum inclinations of south-facing solar collectors during the heating season in China
Eric Hirst, Milan Brace, and **Corey Knutsen**	131	An electric-utility integrated resource plan: a Pacific Northwest example

S. Zubair, V. Bahel, and **M. Arshad** 141 Capacity control of air-conditioning systems by power inverters

M. O. Onyekonwu and **G. K. Falade** 153 Recovery of light oil using *in situ* combustion thermal recovery methods

P. Majumdar and **W. M. Worek** 161 Combined heat and mass transfer in a porous adsorbent

Software Survey Section I

NUMBER 4

John R. Hull and **Kenneth L. Uherka** 177 Magnetic heat pumps for near-room-temperature applications

Robin A. Douthitt 187 An economic analysis of the demand for residential space heating fuel in Canada

T. Y. Yan and **J. R. White** 199 Relative values of coals for electric power generation

Ho-Ming Yeh and **Nien-Tung Ma** 207 Performance of modified membrane-stratified solar ponds

V. Bahel, S. Said, and **M. A. Abdelrahmen** 215 Validation of DOE-2.1A and a microcomputer based hourly energy analysis computer program for a residential building

V. H. Morcos 223 Investigation of vertical seated and lifted free diffusion flames of liquified petroleum gas

Ashok Gadgil and **Bhaskar Natarajan** 229 Impact of socio-economic and architectural factors of peak electricity demand: a case study of South Bombay

Note
V. Bădescu 237 The theoretical maximum efficiency of solar converters with and without concentration

Software Survey Section I

NUMBER 5

H.-M. Groscurth, R. Kümmel, and **W. van Gool** 241 Thermodynamic limits to energy optimization

S. M. Kane and **J. M. Reilly** 259 Competitiveness of the U.S. fuel ethanol industry

Donald S. Remer, Tamar L. di Franco, and **Richard A. Johnson** 277 Technical and economic feasibility of a prototype 4 kW cogeneration package

A. D. Owen 291 Laser enrichment: its impact on the market for natural uranium

Edward Vine and **B. K. Barnes** 299 Monitored indoor temperatures and reported thermostat settings: how different are they?

Software Survey Section I

NUMBER 6

A. B. Cambel and **F. A. Koomanoff** 309 High-temperature superconductors and CO_2 emissions

Kirk Nygren, Radoslav Atanasoski, William H. Smyrl, and **Edward A. Fletcher** 323 Hydrogen and sulfur from hydrogen sulfide—V. Anodic oxidation of sulfur on activated glassy carbon

John Haraden 333 An appraisal of magma power generation and the greenhouse effect

Rohana Ulluwishewa 341 A case study of energy use for domestic cooking by urban dwellers in Colombo City

Manorama Bhattacharyya, Benoy B. Bhowmik, and **Papiya Nandy** 345 Photochemical energy conversion in lecithin liposomes in the presence of phenosafranin and chlorophyll

G. C. Aggarwal 349 Judicious use of dung in the Third World

S. C. Saxena and **R. Vadivel** 353 Heat transfer and hydrodynamic studies in gas-fluidized beds

Hillard G. Huntington 363 The impact of sectoral shifts in industry on U.S. energy demands

Software Survey Section I

NUMBER 7

Abraham Tamir, Ida Elperin, and **Shlomo Yotzer** 373 Performance characteristics of a gas burner with a swirling central flame

A. M. Saatci, I. A. Olwi, R. R. Al-Hindi, A. M. Khalifa, and **M. Akyurt** 383 Passive transport of solar energy downward by heat pipes

E. I. Yantovsky 393 Non-equilibrium thermodynamics in thermal engineering

Joseph Laquatra and **Peter S. K. Chi** 397 Determinants of homeowner's response to energy conservation in non-metropolitan areas

W. E. Alnaser 409 Empirical correlation for total and diffuse radiation in Bahrain

H. Kadete 415 Energy conservation in tobacco curing

M. S. Pena-Taveras and **A. B. Cambel** 421 Nonlinear, stochastic model for energy investment in manufacturing

Software Survey Section I

NUMBER 8

Stephen Meyers and **Jayant Sathaye** 435 Electricity use in the developing countries: changes since 1970

Todd Kappauf and **Edward A. Fletcher** 443 Hydrogen and sulfur from hydrogen sulfide—VI. Solar thermolysis

D. B. Hunsaker, Jr., **J. F. McBrayer**, and **J. L. Elmore** 451 Ethanol production and the environment

Daniel Sperling and **Mark A. DeLuchi** 469 Is methanol the transportation fuel of the future?

Miha Tomšič and **Fouad Al-Mansour** 483 Optimal operation of cogeneration plants in industry

Mazin Kellow 491 Kuwait's approach to mandatory energy-conservation standards for buildings

Software Survey Section I

NUMBER 9

Massoud T. Simnad 503 Analysis of the factors contributing to the one trillion dollars wasted on nuclear power

Ho Suk Choi, Byung Chul Shin, and **Sang Done Kim** 513 Heat transfer in a latent heat-storage system

A. R. deL. Musgrove, **H.-J. Ehmke**, and **K. J. Stocks** 525 Optimum design and operation of ice-storage air-conditioning systems under Australian TOU tariffs

Radu Zmeureanu 537 A case study of energy savings due to the economizer system in Montreal

John Haraden 545 A sensitivity analysis of magma power economics

W. E. Alnaser 551 Calculation of the surface albedo of Bahrain from solar energy data

A. M. R. Al-Marafie, R. K. Suri, and **G. P. Maheshwari** 557 Energy and power management in air-conditioned buildings in Kuwait

Hazim K. Al-Omishy 563 Prediction of the fuel consumption of petrol and diesel vehicles from a computer-simulation model

Note
V. Bădescu 571 On the theoretical maximum efficiency of solar-radiation utilization

Software Survey Section I

NUMBER 10

Jayant Sathaye, Barbara Atkinson, and **Stephen Meyers** 575 Promoting alternative transportation fuels: the role of government in New Zealand, Brazil, and Canada

S. S. Penner 585 Diagnostics on gaseous emissions from waste incinerators

Charles Goldman and **Edward Kahn** 615 Comparative assessment of the demand-side management plans of four New York utilities

Shawn P. Heneghan 629 Energy content of hydrocarbon gas mixtures typical of natural gas

Rong-Hwa Wu and **Chia-Yon Chen** 635 Energy intensity analysis for the period 1971–1984: a case study of Taiwan

Ashok Kumar, Madan Singh, and **J. D. Anand** 643 Transient performance of a double-basin solar still integrated with a heat exchanger

Y. P. Yadav and **L. K. Jha** 653 A double-basin solar still coupled to a collector and operating in the thermosiphon mode

James Van Dyke and **Patricia Hu** 661 Determinants of variation in calculating a discount rate

Alan K. Burnham 667 On solar thermal processing and retorting of oil shale

Note
Edward A. Fletcher 675 Comment "On solar thermal processing and retorting of oil shale" by Alan K. Burnham *Energy* **14,** 667 (1989)

Software Survey Section I

NUMBER 11

Edward L. Vine, B. K. Barnes, Evan Mills, and **Ronald R. Ritschard** 677 The response of low-income elderly to tenant incentive programs

H.-M. Groscurth and **R. Kümmel** 685 The cost of energy optimization: a thermoeconomic analysis of national energy systems

Marvin J. Horowitz 697 Energy efficiency improvements and investment behavior in small commercial buildings

D. R. Brown and **G. E. Spanner** 709 Current cost and performance requirements for residential cool-storage systems

Lin Wenxian 723 Optimum inclinations of south-facing solar collectors during the cooling season in China

William L. Morse and **H. Gil Peach** — 727 — Control concepts in conservation supply

Devi D. Tewari, Suren N. Kulshreshtha, and **A. Schmitz** — 737 — Impacts of energy prices and trade-demand elasticities on Saskatchewan agriculture

Vojin Grković — 747 — Optimizations for district heating of Belgrade from the Kolubara Energy and Industrial Complex

Shyr Tzer Hsu, Zalman Lavan, and **William M. Worek** — 757 — Optimization of wet-surface heat exchangers

Note

P. Radhakrishna and **K. G. Gollakota** — 771 — A pilot plant design and performance for biomethanation of non-edible oil cakes

Software Survey Section — I

NUMBER 12

Daniel A. Dreyfus and **Anne B. Ashby** — 773 — Global natural gas resources

B. W. Ang — 785 — ASEAN energy demand: current trends and future outlook

B. W. Ang and **T. F. Fwa** — 797 — A study on the fuel-consumption characteristics of public buses

V. C. Sharma and **A. Sharma** — 805 — Solar properties of some building elements

S. C. Saxena and **N. S. Rao** — 811 — Fluidization characteristics of gas-fluidized beds: air and glass beads system

E. Taşdemiroğlu and **R. Sever** — 827 — Estimation of total solar radiation from bright sunshine hours in Turkey

Rong-Hwa Wu, Jung-Hsiang Yen, Chia-Yon Chen, and **Sing-Tsu Tsai** — 831 — Energy analysis of an integrated steel mill: a process modeling approach

C. Akyel and **E. Bilgen** — 839 — Microwave and radio-frequency curing of polymers: energy requirements, cost and market penetration

Canan Özgen, Nurcan Baç, Türker Gürkan, and **İsmail Tosun** — 853 — Designing heat-exchanger networks for energy savings in chemical plants

Lin Wenxian — 863 — Optimum inclinations for the entire year of south-facing solar collectors in China

John Haraden — 867 — CO_2 production rates for geothermal energy and fossil fuels

A. Ascoli, J. D. Pandya, and **G. Redaelli** 875 Electrical characterization of a 2.5 kW phosphoric acid fuel cell stack operating on simulated reformed biogas

M. Zaheer-uddin 879 Identifying the domain of overheating on the energy performance curves of a passive solar house

Seyed M. Milani 889 Non-iterative isothermal flash calculations

D. A. Kouremenos, E. Rogdakis, and **K. A. Antonopoulos** 893 A high-efficiency, compound NH_3/H_2O–H_2O/LiBr absorption–refrigeration system

Ramu Ramanathan 907 Diagnostic testing in modeling energy demand

Byung Chul Shin, Sang Done Kim, and **Won-Hoon Park** 921 Phase separation and supercooling of a latent heat-storage material

Daniel S. Christiansen and **David B. Reister** 931 Estimating finding rates for U.S. crude oil

Clive W. J. Granger, Chung-Ming Kuan, Matthew Mattson, and **Halbert White** 943 Trends in unit energy consumption: the performance of end-use models

Notes

S. S. Penner and **M. B. Richards** 961 Estimates of growth rates for municipal-waste incineration and environmental control costs for coal utilization in the U.S.

G. R. Hadder, S. Das, P. N. Leiby, R. Lee, and **R. M. Davis** 965 Navy fuel production during a Middle East political disruption

Software Survey Section I
